DETAILED ACTION

Allowable Subject Matter

Claims 26 and 28 are allowed.

Reason for Allowability

The following is an examiner's statement of reasons for allowance: the primary reason for the allowance is the including, *in combination with other limitations recited in the claims*, the limitations of **the phosphate coating is an iron hydrogen phosphate coating sentered and is combined with an unstable Fe of the Fe component included in the molded body**.

Comparing to the prior-art of the record, Takagi (JP 361186402) teaches the use of iron hydrogen phosphate into the mixture of the magnetic powder that forms the sintered magnet core itself, but Takagi does not teach the material being used in a corrosion resistant coating for the core for combining with the unstable iron in the core to prevent corrosion thereof. Thus, none of the prior art references of the record, either stand-alone or in combination, has taught or suggest the above-mentioned features in combination with other limitations recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
